

Pay & Display - Z600

- **Security assured!** All closings are electrical and internal, no key lock, offering no external weak point to vandalism. The coin box is placed in an internal compartment protected by a double floating case.
- **Ecological design!** Manufactured with over 97% recyclable materials
- **Any colour you like!** We can match your corporate company colour! Present your individual style and give a professional appearance to your car park.

The Z600 pay & display machine is designed to provide the most efficient parking management solution at a highly competitive price. The Z600 is also the smallest on the market, which leaves the maximum space available on the pavement. The Z600 coupled with a remote management and centralised software known as the Z1000, provides a comprehensive solution.

Product description

- Painted aluminium casing surrounds a highly robust stainless steel frame (100mm thickness around coin box).
- Standard color, RAL 7016.
- LCD display with backlight, 5 lines with 16 character in standard mode or 10 lines in maintenance mode.
- Keyboard with 4 programmable buttons.
- Printer, Wake up time is 0.5 seconds. Printing time for one ticket is 1.5 seconds.
- Ambient temperature: -15°C to +70°C.
- Consumption, <1mA in sleep mode.
- Power supply: Solar or mains supply powered. Solar with low power printer allows 2 years operation at 200 tickets a day on a single battery.
- (H) 1645 mm, (W) 210 mm, (D) 200 mm, Weight: 80kg.

Product features

- Exceptional reliability.
- Manufactured with over 97% recyclable materials.
- Accessibility, In compliance with disability regulations.
- Security, All closings are electrical and internal, no key lock, offering no external weak point to vandalism. The coin box is placed in an internal compartment protected by a double floating case.
- Handles most sophisticated tariff schemes.
- Convenient release mechanism for maintenance of coin channel and the chip and pin reader.

Money processing

- Electronic coin verifier (24 different coins).
- Private cards: City, Storekeeper, Craftmans cards, resident tariff.

Options

- Centralised by velocard or GPRS/GSM.
- Numeric keyboard.
- Large screen.
- Any colour in RAL range.

Z1000 software

- Windows/Linux server.
- Web architecture (Client/server).
- Access to data via web browser.
- GSM/GPRS communication.
- Manual transmission by velocard.

Z1000 network

- See the Z1000 datasheet for general specifications and software functions.

Pay & Display -Z1000 remote monitoring

- **User Friendly!** The Graphical user interface (GUI) has been designed to be extremely accessible and provides all users with an easy to use application with powerful functionality.
- **Password protection!** High level flexibility of management access rights, ensuring security and confidentiality is maintained at all times.
- **Instinct functionality!** Financial reporting, statistics, collection data, status of cash stocks, agent checks and live operational status are all instantly available at your finger tips .

The Z1000 is the application server for managing sets of Z600 Pay & Display metres. This application is web based and so, is accessible with an ordinary web browser. It allows the setting of parking meter parameters remotely, to look up sales statistics, current alerts and financial reports, so as to be able to optimise the profitability of the installed base.

Product description

- Windows / Linux server.
- Web architecture (Client / Server).
- Access to the data via your Web browser.
- Wireless communications via GSM/GPRS.
- Manual transmission by Velocard.

Software function

- "Dashboard" home page.
- Management of access rights.
- Detailed transactions logs.
- Current alerts: Technical, financial & operational.
- Financial reports (Collections, status of cash stocks, cards).
- Other reports (Statistics, alerts, technical data, agents' checks).
- Export of data in MS Excel.
- Charge rate and alert editor.
- Real-time transmission by email & SMS of new alerts.
- Daily backup of the database.
- GPS plotting on base locations.
